## 3.0 A, Step-Down Switching Regulator

- 3.3-V, 5-V, 12-V, and adjustable output versions
- Adjustable version output voltage range: 1.2-V to 37-V  $\pm 4\%$  maximum over line and load conditions
- Available in TO-220 and TO-263 packages
- 3-A output load current
- Input voltage range up to 40 V (57V for HV Version)
- Requires only four external components
- Excellent line and load regulation specifications
- 150-kHz fixed-frequency internal oscillator f<sub>sw</sub>
- TTL shutdown capability
- Low power standby mode, I<sub>Q</sub>, typically 80  $\mu$ A
- High efficiency
- Uses readily available standard inductors
- Thermal shutdown and current-limit protection
